Control valve RIA

USAGE

The control flap RIA has been specially designed by us for use in smoke and flue gases up to 1100°C. Depending on specifications, we can offer you RIA in various pre-constructed stages or adapt it precisely to your needs. RIA has an integrated ISO interface. This allows for a direct drive assembly without additional console. Thus, RIA can also be quickly and easily automated afterwards. RIA is very robust, durable, and low maintenance. Due to its safe and proven design, RIA guarantees you high availability in the system, even under extreme operating conditions.
